

PROSYS OPC

EXCEEDING EXPECTATIONS

Premium OPC Prosys is a leading provider of professional OPC software and services, and an experienced partner for industrial and high-tech companies. We help enterprises to win their challenges of interoperability in sophisticated multi-vendor systems. Our customers are modern, efficient and successful organizations and individual professionals.

Safe Investment Prosys OPC products are a future-proof choice ensuring maximum life cycles of system solutions. Our products are built on solid technology and professional knowledge, and systematically developed to meet evolving requirements. This is why our OPC products are used globally from large multi-national companies to single local specialists.

Proven Competence Our flagship product is Prosys OPC UA Java SDK, which brings full OPC UA client, server and application development capabilities to the standard Java environment. We have a long history of intensive product development: our Prosys OPC SDK Sentrol received the OPC Foundation interoperability tested certificate among the first products in the world and as the first OPC software development toolkit already in 2006. We have been a member of the OPC Foundation since 2000 and a member of the UA Early Adopter Working Group since 2006.

Best Service We strive to exceed your expectations through superior service, industrial engineering skills and state-of-the-art OPC expertise. Do not hesitate to contact us whenever you have an OPC related question or need assistance in developing solutions for complex data acquisition or monitoring needs. All our technological, engineering, production and business process expertise is at your disposal, *just ask us.*
